Prior period information has been restated for the adoption of Accounting Standards Codification (ASC) Topic 606, Revenue from Contracts with Customers and Accounting Standards Update No. 2017-07, Improving the Presentation of Net Periodic Postretirement Benefit Cost, which we adopted on January 1, 2018.

"We are now in the second year of our journey as BHGE. The Company's operations are improving, and we are driving change in the industry with our differentiated portfolio. We are focused on commercial innovation, outcome-based models and leveraging our leading technology offerings to drive significant efficiency and productivity enhancements for BHGE and our customers. We remain focused on our priorities of gaining market share, increasing margin rates and delivering strong free cash flow," said Lorenzo Simonelli, BHGE Chairman, President and Chief Executive Officer.

"In the third quarter, we delivered \$5.7 billion in orders and \$5.7 billion in revenues. Adjusted operating income in the quarter was \$377 million. Year-to-date we have generated \$350 million of free cash flow. We delivered \$224 million of synergies in the quarter and are on track to achieve the \$700 million target for the year.

"In Oilfield Services (OFS), the market environment continues to improve, and our well construction product lines are seeing robust activity increases. We remain focused on gaining share in critical markets, and increasing the margin rate, which was up more than 400 basis points year-over-year. This quarter, we secured some critical wins in the Middle East and achieved a number of significant execution milestones with our customers across the Marcellus and Permian basins in North America. We saw strong growth in our Drilling Services and international Pressure Pumping product lines and we outperformed the market in the Middle East and Asia Pacific.

Baker Hughes, a GE company News Release

Baker Hughes, a GE company Announces Third Quarter Results

“In our Oilfield Equipment (OFE) segment, the outlook is steadily improving. This quarter we secured several wins across our portfolio, including our first newbuild blowout preventer (BOP) order since 2014. We are leveraging our flexible partnership models and enhancing our technology offering to drive better, more sustainable subsea economics for customers, and we are well positioned as the market continues to improve.

“In our Turbomachinery & Process Solutions (TPS) segment, we continue to see strength in the LNG market and BHGE is well positioned to benefit as customers move forward with new projects. In the quarter, we secured important awards in the upstream production and pipeline segments and are seeing improvements in our transactional services business. We remain focused on maintaining our LNG leadership and delivering on our cost-out initiatives.

“In our Digital Solutions (DS) segment, another quarter of strong execution led to solid revenue growth and over 350 basis points of margin expansion year-over-year. The oil and gas end markets continue to gain momentum, specifically in pipeline inspection. We are also gaining further traction with customers in our digital offerings and driving growth in our core hardware business across multiple industries, including aviation, automotive and consumer electronics.

“We are encouraged by the improved outlook for the macro environment. We expect both the North American and International markets to grow in 2019 as customers increase spending and overall rig and well counts grow. The offshore market is the strongest it has been in many years and the improving tender and order activity is an encouraging sign as we look out to 2019 and beyond. The LNG outlook is also improving, and we conservatively estimate a total of 65 million tons per annum of new capacity to be sanctioned by 2020. We remain well-positioned for the next build-cycle.

“We continue to leverage our differentiated technology, unique portfolio and our focus on customers to build market-leading product companies and deliver productivity solutions to the oil and gas industry. As we enter the second year of our journey as BHGE, we remain focused on what matters most - delivering for our customers and for our shareholders,” concluded Simonelli.

Quarter Highlights

Customer Wins

BHGE's OFS segment was awarded the first large-scope integrated services contract for the Marjan field in Saudi Arabia, Saudi Aramco's largest upstream development project this year, and the first of three major offshore expansions in Saudi Arabia. BHGE will provide integrated well construction technology and services, including its AutoTrak™ rotary steerable system, logging-while-drilling services, reservoir navigation services, coiled tubing and drilling fluids engineering services.

OFS also secured the largest-ever oilfield services contract awarded in Qatar, a five-year integrated drilling services contract to support offshore and onshore drilling activities. The Company was selected because of its exceptional performance, solid infrastructure and close customer partnership. This represents an important step in expanding BHGE's integrated well services offering to customers in the Middle East.

BHGE's OFE segment secured important wins in the North Sea this quarter. Nexen Petroleum awarded the Company a contract to provide subsea production systems for the Buzzard Phase II project in the UK North Sea. BHGE will supply six medium-water horizontal subsea trees (production and water injection), wellheads and subsea and topside control systems for the project. BHGE will also provide oilfield services, including integrated drilling, evaluation, completions, intervention and other well-related services.

Also in the North Sea, OFE secured a three-year extension to a subsea services frame agreement with Equinor. As part of the agreement, BHGE will provide a wide-range of aftermarket and life-of-field management services, including repair, testing, offshore field-service support, well intervention and obsolescence management.

OFE won its first new build blowout preventer (BOP) order since 2014 for a semi-submersible drilling rig in Asia. BHGE will provide the subsea well control package, which consists of a five-cavity BOP stack, wellhead connectors, a subsea control system and a marine drilling riser system.

The TPS segment secured its fourth floating production storage and offloading vessel (FPSO) win of the year, up from just one FPSO in 2017. BHGE will provide gas turbine generators, drivers and electric motor driven compressors, and will work closely with the customer on all commercial and technical aspects of the project.

TPS' Pipeline & Gas Processing business secured an award to provide turbocompressor packages, using the PGT25 Plus aeroderivative gas turbine technology with dry low emission combustors, at two compression stations on a pipeline in Canada.

The DS segment was awarded a large contract for condition monitoring and control systems at the Bruce Power Plant in Canada. The contract includes the Company's industry-leading Mark VIe turbine controls as well as BHGE's Bently Nevada condition monitoring technology, Security ST cybersecurity protection suite and turbine simulator software, which demonstrates BHGE's unique ability to combine hardware and software successfully.

DS' Condition Monitoring and Control Systems business is expanding into the mining segment, and this quarter secured a major contract with a customer in Latin America to deploy a plant-wide condition monitoring system across their operations. The wireless condition-based monitoring solution, which enables customers to gain access to data in hard-to-reach areas, is continuing to gain traction with customers in the Middle East, Latin America and North America.

Technology and Innovation

BHGE's OFE segment is developing a new family of modular products that work together as an integrated subsea system to optimize life-of-well costs. Its new lightweight compact tree is 50% lighter than its predecessor and reduces manufacturing and installation costs. Its new compact block manifold reduces cycle time, cost and footprint. The Company is also developing the world's first subsea multi-phase pump without a barrier fluid system, which allows the pump to be configured to different field requirements quickly and easily. The connecting system enables fast and reliable connections between all three elements, ensuring better reliability and reducing complexity and risk.

Executing for Customers

BHGE's advanced drilling portfolio continues to deliver superior performance for customers. In the third quarter, BHGE set a drilling world record, delivering over nine thousand feet in a 24-hour period for a customer in the Marcellus. The team used its remote monitoring capabilities to ensure the well path stayed in the target zone 100% of the time, resulting in 35% lower drilling costs. Over the last three years, BHGE has drilled over a mile a day in more than 200 wells in the Marcellus and Utica basins, demonstrating its ability to deliver world-class results on a consistent and sustainable basis.

In the Permian this quarter, BHGE partnered with a large customer to improve drilling performance on existing assets. The Company's leading drilling solutions including its AutoTrak™ Curve rotary steerable system, Dynamus™ Extended-Life drill bits and an experienced field crew delivered the first well 50% faster than planned, with very high accuracy.

In September, BHGE announced the successful deployment of its digital Plant Operations Advisor solution across BP's operated platforms in the Gulf of Mexico, marking the largest "Industrial Internet of Things" deployment in the industry. BHGE has now started implementing the technology with another large international customer, demonstrating its ability to provide advanced software capabilities across different customer environments.

Consolidated Results by Reporting Segment*

Consolidated Orders by Reporting Segment

(in millions)

Consolidated segment orders	Three Months Ended			Variance	
	September 30, 2018	June 30, 2018	September 30, 2017	Sequential	Year-over-year
Oilfield Services	\$ 3,011	\$ 2,866	\$ 2,734	5 %	10 %
Oilfield Equipment	553	1,035	760	(47)%	(27)%

Digital Solutions	629	637	918	(1)%	(31)%
Total	\$ 5,746	\$ 6,036	\$ 5,745	(5)%	— %

Orders for the quarter were \$5,746 million, down 5% sequentially and flat year-over-year. This sequential decrease was driven by lower orders in Oilfield Equipment primarily driven by orders timing, partially offset with growth in Oilfield Services and Turbomachinery & Process Solutions. Equipment orders were down 11% and service orders were flat sequentially.

Year-over-year, orders in both Turbomachinery & Process Solutions and Oilfield Services grew. This was offset by lower Oilfield Equipment and Digital Solutions orders. Year-over-year equipment orders were down 8% and service orders were up 6%.

The Company's total book-to-bill ratio in the quarter was 1.0; equipment book-to-bill ratio in the quarter was 1.0.

Remaining Performance Obligations (RPO) in the third quarter ended at \$20.8 billion, a decrease of \$0.1 billion from the second quarter of 2018. Equipment RPO was \$5.4 billion, flat sequentially. Services RPO was \$15.3 billion, down 1% sequentially.

Consolidated Revenue by Reporting Segment

(in millions)

Consolidated segment revenue	Three Months Ended			Variance

Digital Solutions	653	662	614	(1)%	6 %
Total	\$ 5,665	\$ 5,548	\$ 5,301	2 %	7 %

Revenue for the quarter was \$5,665 million, an increase of \$118 million, or 2%, sequentially. The increase was driven primarily by higher volume in Oilfield Services and Oilfield Equipment, which was up 4% and 2% respectively, partially offset by lower volume in Digital Solutions, which was down 1%. Turbomachinery & Process Solutions was flat sequentially.

Compared to the same quarter last year, revenue was up 7%. Oilfield Services was up 12%, Digital Solutions was up 6%, and Oilfield Equipment was up 3%, partially offset by Turbomachinery & Process Solutions which was down 2%.

**Non-GAAP measure (see Table 1a in the section entitled "Charges and Credits" for a reconciliation from GAAP).

"F" is used in most instances when variance is above 100%. Additionally, "U" is used in most instances when variance is below (100)%.

On a GAAP basis, operating income for the third quarter of 2018 was \$282 million. Operating income increased \$204 million sequentially and \$475 million year-over-year. Total segment operating income was \$475 million for the third quarter of 2018, up 23% sequentially and up 84% year-over-year.

Adjusted operating income (a non-GAAP measure) for the third quarter of 2018 was \$377 million, which excludes adjustments totaling \$95 million before tax, mainly related to restructuring charges, merger and related costs, and inventory impairments. A complete list of the adjusting items and associated reconciliation from GAAP has been provided in Table 1a in the section entitled "Charges and Credits." Adjusted operating income for the third quarter was up \$88 million, or 30% sequentially, driven by margin expansion across all product companies. Adjusted operating income was up \$207 million year-over-year driven by higher revenues and margin expansion in Oilfield Services, Oilfield Equipment and Digital Solutions, partially offset by Turbomachinery & Process Solutions.

Depreciation and amortization for the third quarter of 2018 was \$353 million.

Corporate costs were \$98 million in the third quarter of 2018, flat sequentially and up \$9 million year-over-year.

Other Financial Items

Income tax expense in the third quarter of 2018 was \$110 million.

GAAP diluted earnings per share were \$0.03. Adjusted diluted earnings per share were \$0.19. Excluded from adjusted earnings per share were all items listed in Table 1a in the section entitled "Charges and Credits" as well as the "other adjustments (non-operating)" found in Table 1b. The other adjustments (non-operating) were driven by a \$85 million charge relating to BJ Services.

Cash flows generated from operating activities were \$239 million for the third quarter of 2018. Free cash flow (a non-GAAP measure) for the quarter was \$146 million. Free cash flow included \$151 million of merger and restructuring-related cash payments. A reconciliation from GAAP has been provided in Table 1c in the section entitled "Charges and Credits."

Capital expenditures, net of proceeds from disposal of assets, were \$94 million for the third quarter of 2018.

Results by Reporting Segment

The following segment discussions and variance explanations are intended to reflect management's view of the relevant comparisons of financial results on a sequential or year-over-year basis, depending on the business dynamics of the reporting segments.

Oilfield Services

<i>(in millions)</i>	Three Months Ended			Variance	
	September 30, 2018	June 30, 2018	September 30, 2017	Sequential	Year-over-year

Revenue	\$ 2,993	\$ 2,884	\$ 2,661	4%	12%
Operating income	\$ 231	\$ 189	\$ 88	22%	F
Operating income margin	7.7%	6.6%	3.3%	1.1pts	4.4pts

Oilfield Services (OFS) revenue of \$2,993 million for the third quarter increased by \$109 million, or 4%, sequentially.

North America revenue was \$1,212 million, up 3% sequentially. International revenue was \$1,781 million, an increase of 4% sequentially, driven by Asia Pacific, the Middle East and Latin America. From a product line perspective, the sequential increase of 4% in OFS was driven primarily by Drilling Services, Pressure Pumping, Artificial Lift and Completions.

Segment operating income before tax for the quarter was \$231 million. Operating income for the third quarter of 2018 was up \$42 million, or 22%, sequentially, primarily driven by volume increases, synergy benefits and lower depreciation, partially offset by negative foreign exchange impacts.

Oilfield Equipment

<i>(in millions)</i>	Three Months Ended			Variance	
	September 30, 2018	June 30, 2018	September 30, 2017	Sequential	Year-over-year

Orders	\$ 553	\$ 1,035	\$ 760	(47)%	(27)%
Revenue	\$ 631	\$ 617	\$ 613	2 %	3 %
Operating income (loss)	\$ 6	\$ (12)	\$ (41)	F	F
Operating income (loss) margin	0.9%	(1.9)%	(6.6)%	2.8pts	7.5pts

Oilfield Equipment (OFE) orders were down \$207 million, or 27%, year-over-year, driven primarily by deal timing. Equipment orders were down 41% driven by lower order intake in the Subsea Production Systems and Flexible Pipe businesses. The equipment book-to-bill ratio in the quarter was 0.9. Services orders were up 14% primarily driven by higher order intake in the Drilling Systems and Surface Pressure Control businesses.

OFE revenue of \$631 million for the quarter increased \$18 million, or 3%, year-over-year. The increase was driven by higher volume in the Subsea Production Systems business, Subsea Drilling Systems business, and Surface Pressure Control business. These increases were partially offset by lower volume in the Flexible Pipe business.

Baker Hughes, a GE company News Release*Baker Hughes, a GE company Announces Third Quarter Results*

Segment operating income before tax for the quarter was \$6 million, up \$47 million year-over-year. The increase was driven by higher cost productivity, lower impact from foreign exchange, and higher volume.

Turbomachinery & Process Solutions

<i>(in millions)</i>	Three Months Ended			Variance	
	September 30, 2018	June 30, 2018	September 30, 2017	Sequential	Year-over-year

Revenue	\$ 1,389	\$ 1,385	\$ 1,414	—%	(2)%
Operating income	\$ 132	\$ 113	\$ 134	17%	(2)%
Operating income margin	9.5%	8.2%	9.5%	1.3pts	—

Turbomachinery & Process Solutions (TPS) orders were up 16% year-over-year. Equipment orders were down 10%. Service orders were up 41% driven primarily by higher transactional and contractual service orders.

TPS revenue of \$1,389 million for the quarter decreased \$25 million, or 2%, year-over-year. The decrease was driven by lower equipment volume, partially offset by an increase in revenue in Services as well as Flow and Process Technologies businesses. Equipment revenue in the quarter represented 38% of total segment revenue, and Service revenue represented 62% of total revenue.

Segment operating income before tax for the quarter was \$132 million, down \$2 million, or 2%, year-over-year. The decline was driven primarily by lower volume, partially offset by deflation benefits and favorable cost productivity.

Digital Solutions

<i>(in millions)</i>	Three Months Ended			Variance	
	September 30, 2018	June 30, 2018	September 30, 2017	Sequential	Year-over-year

Operating income margin	16.3%	14.6%	12.5%	1.7pts	3.8pts

Digital Solutions (DS) orders were down 31% year-over-year, driven primarily by the non-repeat of a large Digital order in the third quarter of 2017.

DS revenue of \$653 million for the quarter increased 6% year-over-year, mainly driven by the Bently Nevada and Pipeline and Process Solutions businesses, partially offset with lower volume in the Controls business.

Segment operating income before tax for the quarter was \$106 million, up 38% year-over-year. The increase year-over-year was primarily driven by increased productivity including synergy realization, and to a lesser extent by higher volume.

Free cash flow (non-GAAP)	\$ 146	\$ (22)	\$ (405)	\$ 350	

Table 1c reconciles net cash flows from operating activities, which is the directly comparable financial result determined in accordance with GAAP, to free cash flow (a non-GAAP financial measure). Free cash flow is defined as net cash flows from (used in) operating activities less expenditures for capital assets plus proceeds from disposal of assets.

Management provides non-GAAP financial measures in Tables 1a, 1b, and 1c because it believes such measures are widely accepted financial indicators used by investors and analysts to analyze and compare companies on the basis of operating performance and liquidity, and that these measures may be used by investors to make informed investment decisions.

Forward-Looking Statements

This news release (and oral statements made regarding the subjects of this release) may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, (each a "forward-looking statement"). The words "anticipate," "believe," "ensure," "expect," "if," "intend," "estimate," "project," "foresee," "forecasts," "predict," "outlook," "aim," "will," "could," "should," "potential," "would," "may," "probable," "likely," and similar expressions, and the negative thereof, are intended to identify forward-looking statements. There are many risks and uncertainties that could cause actual results to differ materially from our forward-looking statements. These forward-looking statements are also affected by the risk factors described in the Company's annual report on Form 10-K for the annual period ended December 31, 2017; the Company's subsequent quarterly reports on Form 10-Q for the quarterly period ended March 31, 2018 and June 30, 2018; and those set forth from time to time in other filings with the Securities and Exchange Commission ("SEC"). The documents are available through the Company's website at: www.investors.bhge.com or through the SEC's Electronic Data Gathering and Analysis Retrieval ("EDGAR") system at: www.sec.gov. We undertake no obligation to publicly update or revise any forward-looking statement.

Our expectations regarding our business outlook and business plans; the business plans of our customers; oil and natural gas market conditions; cost and availability of resources; economic, legal and regulatory conditions, and other matters are only our forecasts regarding these matters.

These forward-looking statements, including forecasts, may be substantially different from actual results, which are affected by many risks, along with the following risk factors and the timing of any of these risk factors:

Integration activities - the ability to successfully integrate Baker Hughes with GE Oil & Gas, including operations, technologies, products and services.

Economic and political conditions - the impact of worldwide economic conditions; the effect that declines in credit availability may have on worldwide economic growth and demand for hydrocarbons; foreign currency exchange fluctuations and changes in the capital markets in locations where we operate; and the impact of government disruptions.

Dependence on GE - any failure by GE to supply products and services to us in accordance with applicable contractual terms could have a material effect on our business.

Baker Hughes, a GE company Announces Third Quarter Results

Orders and RPO - our ability to execute on orders and RPO and convert those orders and RPO to revenue and cash.

Oil and gas market conditions - the level of petroleum industry exploration, development and production expenditures; the price of, volatility in pricing of, and the demand for crude oil and natural gas; drilling activity; drilling permits for and regulation of the shelf and the deepwater drilling; excess productive capacity; crude and product inventories; liquefied natural gas supply and demand; seasonal and other adverse weather conditions that affect the demand for energy; severe weather conditions, such as tornadoes and hurricanes, that affect exploration and production activities; Organization of Petroleum Exporting Countries ("OPEC") policy and the adherence by OPEC nations to their OPEC production quotas.

Terrorism and geopolitical risks - war, military action, terrorist activities or extended periods of international conflict, particularly involving any petroleum-producing or -consuming regions; labor disruptions, civil unrest or security conditions where we operate; potentially burdensome taxation, expropriation of assets by governmental action; cybersecurity risks and cyber incidents or attacks; epidemic outbreaks.
